BlueSpice 3.0.1

BlueSpice 3.0.1 is a patch release.

Notable Changes

- VisualEditor: Switch between source mode and visual mode is now possible without saving
- Privacy Center and Admin: Allows users and site maintainers to manage their personalized data
- CustomizableMenu: Adds a top menu to the site
- Flagged Revisions: New overview list for revision status of pages
- Calumma: Display of menus and featured actions depends on rights, not on logged in status
- Calumma: Added a backlink from discussion page to content page

BlueSpice Foundation

- Foundation: Add `autocreateaccount` right to role `reader`
- Foundation: Add base class for hook BSApiStoreBaseBeforeReturnData
- Foundation: Add Bosnian alias and cleanup *.alias.php files
- Foundation: Add custom menu skin data

- Foundation: Add detection for when articlepreviewcapture is not handled by default handler
- Foundation: Add progressive button styling for ExtJS
- Foundation: Do not grant every permission to sysop, only if not previously assigned
- Foundation: Exclude modification on link attributes for all mw tests
- Foundation: Extend permission configs rather than overwriting
- Foundation: Fix "unknown parameter" error on API calls to ExtJS stores
- Foundation: Fix msg key after #470326
- Foundation: Fix Role::removePermission
- Foundation: Fix badly stretched user images again
- Foundation: Fix keyValueInputWidget deletion bug
- Foundation: Fix line sizes to pass tests
- Foundation: Fix list filtering for ExtJS
- Foundation: Fix missing i18n key
- Foundation: Improve WikiTextLinksHelper
- Foundation: List allowed groups on locked down namespace
- Foundation: Make LessVars overwriteable. ERM:13150
- Foundation: Move BsCacheHelper to UtilityFactory and remove the invalidations
- Foundation: Put prefixed page title in data-bs-title
- Foundation: Refactor namespace lockdown logic
- Foundation: Remove BsCategoryHelper as its last usage was in version BS2.23
- Foundation: Remove old attribute limitation. Only storable fields will be saved anyway
- Foundation: Remove support for other db types. ERM:10576
- Foundation: Remove targets from ResourceLoader modules
- Foundation: Remove unused common constants that have been used for extension registration in BS1*
- Foundation: Remove usage of BsLinkProvider and mark it as deprecated
- Foundation: Remove usage of deprecated BsSpecialPage
- Foundation: Skip adding data attributes in unit test context to pass tests
- Foundation: Update doc for service InterWikiLinkLookup in ServiceDecorator

Translation

BlueSpice is translated at translatewiki.net. Many, many thanks for your contributions! Special thanks go out to Raimond Spekking and Siebrand Mazeland for all the i18n reviews.

Standing on the shoulders of giants

We would like to thank all the people around MediaWiki. You've created a wonderful piece of software. Thanks a lot!
